WORK EXPERIENCE

Tealeaf Technology, IBM, *Software Engineer*

6/2012 – 9/2013

- Placeholder

Elements, Inc., *Software Developer*

8/2008 – 12/2011

- Developed franchise-oriented content management system, data migration & build automation tools, web services, business reports, and various other custom applications for use in franchise, health care, real estate, and private equity industries; Some technologies used include IIS, MS SQL Server, C#/VB .NET, Apache, MySQL, PHP, Flash, Flex, and Adobe AIR.
- Worked with corporate and local businesses owners from national franchises such as: *Maaco Collision Repair & Auto Painting, CertaPro Painters, Floor Coverings International, Weed Man Lawn Care*, and others, to create email marketing campaigns, improve customer engagement, and generate thousands of search engine optimized local franchise websites.
- Handled transition of data & technology after former company was acquired by *Elements, Inc.*

Verve Internet Solutions, *Web Developer*

12/2007 – 8/2008

- Developed features for proprietary CMS, performed maintenance on legacy software, and produced websites using dynamic code generation techniques.
- Worked directly with non-profits in the Philadelphia area, such as: *The Delaware Valley Green Building Council, The Consumer Credit Counseling Service of Delaware Valley, The Philadelphia Mummers Fancy Brigade Association*, and *Merion Mercy Academy*, to provide technical support, maintenance, content updates, and website enhancements.

Austin District Music Teachers Association, *Freelance Web Developer*

5/2008 – 9/2008

- Developed online portal to schedule events, manage student enrollment, and generate PDFs for approximately 125 teachers.

Eshilon Design Inc., *Freelance Web Production Assistant*

1/2008 – 3/2008

- Created cross-browser compatible XHTML/CSS templates from Photoshop PSDs that comply with accessibility and Section 508 standards.

Central High School, *Technical Assistant & Web Developer*

9/2005 – 7/2006

- Volunteered with IT department to manage computer labs, diagnose networking issues, and provide technical support for approximately 150 faculty members and 2,300 students.
- Designed website to improve availability of information & increase student engagement, and created a custom CMS featuring role-based permissions, workflow, and extensive logging.
